# TABLE OF CONTENTS

### Volume I:

## General aspects

**Ferroalloy industry of Ukraine: current status, development trends and future prospects**
*Grishchenko S.G., Kutsin V.S., Kravchenko P.A., Soloshenko V.P., Bespalov O.L., Kudryavtsev S.L.*

**History and New milestones in submerged arc furnace technology for ferro alloy and silicon production**
*Fröhling C., Meyn M., Degel R., Niekerk A.van., Köneke M.*

## PRODUCTION TECHNOLOGIES AND OPERATION

### Presmelting Operations

**Technology improvement of refractory chromite ores clotting**
*Akberdin A., Kim A., Zinyakova O.*

**The development of fine manganese concentrate lumping technology at PJSC Nikopol Ferroalloy Plant**
*Kutsin V.S., Olshansky V.I., Filippov I.Yu., Chumakov A.A.*

**Resource saving in manganese ferroalloy production using low-grade manganese ore concentrates**
*Projdak Y. S., Myanovskaya Y. V.*

**Charge and briquettes properties for the production of aluminum-silicon alloys**
*Ovcharuk A.N., Taran A., Krivenko V.V., Mingsheng Y.*

### Chromium Alloys Production and Operation

**Study of carbothermic reduction processes in the manufacture of high-carbon ferrochrome**
*Zayakin O.V., Zhuchkov V.I., Afanasyev V.I.*

**Vacuum-thermal method of deep refining of ferrochromium in solid state**
*Gasik M. I., Gasik M. M.*

**Implementation of Tenova pre-heating technology at JSC Kazchrome**
*Jonker A.P., Broadbent M.*

**High carbon ferrochromium operational manageability while diversifying products**
*Yavuchan K.*

**Evaluation on heat and materials balance of CO₂ involved in converter process for M-LcFeCr production**
*Yu H. C., Wang H. J., Xu Z. B.*

### Manganese Alloys Production and Operation

**Mastering of ferrosilicon manganese melting with highly reactive reducing agent**
*Grishchenko S.G., Ovcharuk A.N., Olshansky V.I., Filippov I. Yu., Taran A.Yu., Chalenko V.I., Dudyak V.N., Pavlenko S.V.*

**Manganese ferroalloys production from Russian manganese ores**
*Dashhevskiy V.Ya., Zhdanov A.V., Zhuchkov V.I., Leontyev L.I.*

**The use of fine water sprays to suppress fume when casting refined ferromanganese**
*Cowx P., Nordhagen R., Kadkhodabeigi M., Els L., Kero I.*

**The AlloyStream™ process for HCFeMn production**
*Müller J., Coetsee T., Groenewald J.A., Toit de A.A. and Zeelie D.*
Energy efficiency and environmental friendliness are the future of the global Ferroalloy industry.
Rapid redesign and Restart of the Vale Onça Puma Nickel Smelter

Construction and commissioning of ERAMET SiMn + EMM plant in Gabon
L’Huillier P. 229

Intelligent solutions for ferroalloy production of Paul Wurth

A 90 MW calcium carbide furnace – mechanical design
McCaffrey M., Ku H., Reid R., Robinson S., Sizemore F. 247

**Lining**

Refining of ferroalloys with the CLU® process
Beskow K., Rick C-J and Vesterberg P. 256

RHI refractory solutions - a reliable partner for the ferroalloys industry
Wenzl C., Spanring A. 264

Lining management - residual life assessment
Mohanty B. 270

Evaluation of furnace refractory linings after sixteen years of producing silicomanganese
O'Shaughnessy P. and Roux Le F. 278

Burn down, excavation and relining ENS12 2013/2014
Lindseth A.G., Xayasenh A., Lecacheux B., Cowx P., Dimet A. 300

Advances in waterless cooling for extended refractory campaign life
Parravani M., Jastrzebski M., Coull Z., Wasmund B. 308

Monitoring of electrical, thermal and technological processes in ore-thermal electric furnace for the production of high-carbon ferrochrome
Kolyvanov S.Y., Savel'ev S., Rubtsovclaim V.V., Kondrashov, V. P., Lykov, A. G. 317

**Design and Control**

Temperature profiles in Söderberg electrodes
Skjeldstad A., Tøngstad M., Lindstad L., Larsen B. 327

Electrode voltage measurement in electric furnaces: analysis of error in measurement and calculation
Tracy P., Gerritsen T., Saber F. 338

Electrode controller-leading to energy efficiency
Mohanty B. 349

Research of the operation modes of self-baking electrodes of high-power electric ore-smelting furnaces at PJSC “Nikopol FerroAlloy Plant”
Grinshpunt A.G., Dedov Yu.B. 358
# TABLE OF CONTENTS

**Volume II:**

## FUNDAMENTALS, THEORY

### Reductants

Influence of coking process parameters on structural properties of “Direcsil” reductant
*S. Kim, M. Tolymbekov, V. Kim, N. Lu*

Carbon materials for silicomanganese reduction
*Sethulakshmy Jayakumari and Merete Tangstad*

Effect of South African reductants on ferrochrome production
*Xiaowei Pan*

Quartz and carbon black pellets for silicon production
*Fei Li, Merete Tangstad, Ingeborg Solheim*

On the mechanical strength of extrusion briquettes (BREX) for ferroalloy production
*A.M. Bizhanov, V.Ya.Dashevskii*

### Chromium Fundamentals

Development of new ferroalloys compositions with chromium
*Zhuchkov V.I., Andreev N.A.*

Effect of sulphur at reducing atmosphere on the chromite pellet properties
*A. Heikkilä, J. Raiskio and T. Fabritius*

A novel process to produce chromium ferroalloys by use of solar grade crystalline silicon cutting slurry waste
*P. W. Han  P. X. Chen  S.J. Chu  L. B. Liu  R. Chen*

Physical and chemical background of solid-phase obtaining of Fe - Cr ligature by gas-carbothermic reduction
*Grishin A.M., Simonov V.K., Shcheglova I.S.*

### Manganese Fundamentals

Melting Behaviour of Mn sources - effect on furnace performance
*Eli Ringdalén, Merete Tangstad, Thomas Brynjulfsen*

The comprehensive analysis of physical and chemical properties and metallurgical value of foreign manganese raw materials used during ferroalloy production
*S.G. Grishchenko, V.V. Krivenko, A.N. Ovcharuk, V.I. Olshansky, I.Yu. Filippov*

The study of silicon chemical bond in modeled silicate systems and manganese ores using x-ray photoelectron spectroscopy
*Gladkikh V. A., Gasik M.I.*

Reduction behaviour of manganese ore using methane gas
*Amit Bhailla and R Hurman Eric*

The investigation of phosphorus chemical bond in the manganese-ore materials
*M.I. Gasik, V.A. Gladkikh*

Dissolution of silica in slag in silicomanganese production
*Samane Maroufi, George Ciezki, Sharif Jahanshahi, Shouyi Sun and Oleg Ostrovski*

---

The Fourteenth International Ferroalloys Congress  
Energy efficiency and environmental friendliness are the future of the global Ferroalloy industry  
Kiev, Ukraine  
May 31-June 4, 2015
The thermodynamic studies of silication processes and manganese and silicon carbothermic reduction using system tetraedration method MnO-SiO₂-CaO-MgO

The study of magnesium oxide influence on thermophysical and electric properties of ferrosilicon manganese slag

Research on de-titanium of silicomanganese ferroalloy by blowing N2

S. J. Chu P. X. Chen S. L. Zeng

Tap-hole wear: analysis of daily average slag and metal compositions of a single SiMn smelter

J.D. Steenkamp and P.C. Pistorius

Activation energy of nitriding 0.23%C ferromanganese

S. Ghali, M. Eissa & H. El-Faramawy

**Ferronickel, Ferrosilicon & Other Alloys Fundamentals**

Reduction of a garnieritic laterite ore by CO-CO₂ gas mixtures

J. Yang, G. Zhang, S. Jahanshahi and O. Ostrovski

The solubility of carbon in molten iron-nickel-silicon alloy at 1773K and 1823K

P.X. Chen S.J. Chu P. W. Han

Pretreatment of reductive dephosphorization slags generated in high silicon ferronickel production

M.Y. Lu, H.J. Wang, B. Song, S.J Chu

Diagram of phase structure of metallic system in liquid state

S. Baisanov, Ye. Shabanov, A. Baisanov, A. Issagulov, Ch. Laurent

Synthesis of silicon carbide by carbothermal reduction of quartz in H₂-Ar gas mixtures

Xiang Li, Guangqing Zhang, Kai Tang, Oleg Ostrovski and Ragnar Tronstad

Researching of thermophysical processes in acheson furnace for the production of silicon carbide

I.V. Derevyanko, A.V. Zhadanos

Viscosity of SiO₂-MgO-Al₂O₃-FeO Slag for nickel laterite smelting process

Lv Xueming, Qiu Jie, Liu Meng, Liu Mei, Lv Xuewei

Technology of Obtaining New Generation of Complex Ferroalloy with the Use of Kazakh Barite Ore

S. O. Baisanov, V. A. Salina, Z. M. Tokaeva

**Modelling and Simulation**

Mathematical and computational modelling of MHD effects in entrained droplets of slag and metal

Q.G. Reynolds

Mathematical models for metallurgical scale-Up

S. A. Halvorsen, R. Schlanbusch and S. Shinkevich

Modeling of off-gas and particles flow under roff of a closed submerged arc furnace

M. Kadkhodabeigi, B. Ravary and D. O. Hjertenes

Application of artificial neural network modeling for predicting the ferro alloys furnace output

Dr. Rajib Kumar Mohapatra

Learning and teaching using process modeling and simulation

Xiaowei Pan
Life-Cycle impacts and costs of manganese losses and recovery during ferromanganese production

Modeling on emulsification of slag and metal in shaking ladle
S. Q. Ni, S. J. Chu, J. Zhang2 636

ENERGY AND ENVIRONMENT

Energy
Experience of cogeneration plant design to obtain power and heat in order to decrease ferroalloy manufacture costs
V.F. Shevchenko, S.I. Maslennikova, G.D. Kiosev 644

Furnace power supply requirements for a high powered smelting furnace
D. Shevchenko, B. Anderson, J. Wikston and L. Kadar 649

Use of ultra-low frequency furnaces for ferroalloys melting
P. Kravchenko, S. Balashov, O. Bespalov, D. Malienko, V. Litvyak, D. Blizniuk 658

Energy consumption during HCFeCr production at Ferbasa
Eli Ringdalen, Marcelo Rocha, Paulo Figueiredo 668

Operating a DC electric arc furnace on a weak grid challenges and solutions
S. Tambe, R. Stadler 676

Industrial demonstration of arc detection in DC arc furnaces
C. J. Hockaday, Q. G. Reynolds, D. T. Jordan 682

Etikrom Inc. waste gas heat recovery project and opportunities for Russian ferroalloy smelters
Dr. Alparslan Malazgirt, Yavuzhan Kaya 689

The determination of real phase parameters of rectangular six-electrode ore-smelting furnace of type RPZ-63.

Directions of saving energy resources in the technology of orethermal processes
Victor Syvachenko, Victor Yemchyskyy, Vadym Nezhuryn 700

Environment
Dust emission minimizing, measuring and monitoring in FeCr-production in Tornio Works
M. Päättalo, J. Raikko 703

A novel dry-based system for safe, hygienic energy recovery from ferroalloy furnace exhaust
Michael Trovant, Arran McGrath, Mirza Haque 709

Ecological aspects of ferroalloys and silicon metallurgical works – economical solutions
C., Fröhling, SMS Group, R., Degel, SMS Group 719

Development and introduction of an innovative technology of exhaust gas purification for manufacture of manganese agglomerate
V.V. Osypenko, V.D. Osypenko, S.P. Shuvayev, Iu.I Korkodola 724

Innovative approaches when creating modern environmentally safe and energy efficient ferroalloy productions
D. V. Stalinsky, Y. L. Petrov 733
Recycling

Use and processing of dust of dry gas cleaning of ferrosilicon furnaces
Sergey Balashov, Sergey Babko, Leonora Likhobitskaia, Yelizaveta Shyshkina

The development and introduction of resource saving technology of non-standard manganese ferroalloy fines recycling

Design solutions on utilization of ferroalloy fine fractions and metal and slag separation at ferroalloy plant
V.F. Shevchenko, S.I. Maslennikova, G.D. Kiosev

Wastes generation and use in ferroalloy production
Zhdanov A.V., Zhuchkov V.I., Dashevskiy V.Ya., Leontyev L.I.

Electrolytic manganese from ferroalloy production furnace flying dust

COMMERCIAL ASPECTS

Markets

Benchmarking in the ferromanganese production processes
B Kaelo Sedumedi, Dr Xiaowei Pan

Applications and Uses

On probable ways of steelmaking and ferroalloy industry development
L.B. Medovar, S.G. Grishchenko, G.P. Stovpchenko, A.L. Kukharev, V.K. Granovskii

Steel deoxidation and alloying control model in the converter plant
V.S. Bogushevskiy, V.Yu. Sukhenko

Estimate of desulphurizing ability of slags with the use of integral tests which characterises melted slag as a chemically uniform system
Kamkina L.V., Togobitskaya D.N. and Sokur Yu.I.
