

CONTENTS

Author Index	881
--------------------	-----

PLENARY SESSION I

The Changing Trends in Research on Slags by R. Boom and K.C. Mills	3
● Structural Aspects of Slags by D.R. Gaskell	11
● Modelling of Slag Thermodynamic Properties – From Oxides to Oxisulphides by H. Gaye and J. Lehmann	27
The Slag-Metal Interface and Associated Phenomena by A.W. Cramb, Y. Chung, J. Harman, A. Sharan and I. Jimbo	35

ACTIVITIES I

Activity Measurement of the Constituents in Secondary Steelmaking Slag by M. Hino, S. Kinoshita, Y. Ehara, H. Itoh and S. Ban-Ya	53
Thermodynamics of TiO_x in Blast Furnace Slags by B. Ozturk, A. Aydogdu, Y. Morizane and R.J. Fruehan	59
Activities in CaO-SiO ₂ -CrO _x Slag System at 1600°C by Y. Xiao and L. Holappa	69
Modelling of Activity of MnO in Ferromanganese and Silicomanganese Slags by Neural Nets by H. Cengizler, R.H. Eric and M. Reuter	75
Thermodynamic Study on MnO Behavior in MgO-Saturated Slag Containing FeO by C. Rhee, S. Jung and D. Min	91

GAS-SLAG REACTION KINETICS

Relative Rates of H ₂ O and CO ₂ Reaction with Model Bath Smelter Slags by L. Yang and G.R. Belton	101
Kinetics of Oxygen Evolution from Fe ₂ O ₃ -CaO-SiO ₂ -Al ₂ O ₃ Slags by D. Xie and G.R. Belton	109
Interfacial Reactions of Low Iron-Containing Slag with CO ₂ -CO Mixtures by T. Tran, S. Sun and S. Jahanshahi	115
● Effects of Iron Oxide and Sulphur Content on the Rate of Reduction of ZnO from Slags by CO-CO ₂ Gas Mixtures by I. Dal, S. Jahanshahi and W.J. Rankin	125
● Reduction of Waste Smelter Slags using Top-Submerged Injection of Gaseous Reductants by X. Yan, N. Li and E.J. Grimsey	135

INTERFACIAL TENSION

Effect of Alloy Elements on Interfacial Tension between Slag and Molten Iron by H. Sun, N. Yoneda, K. Nakashima and K. Mori	149
Density and Surface Tension of CU O Slag by T. Nakamura, T. Takasu, H. Itou and M. Edo	157
Interfacial Energy between CaO-SiO ₂ -Al ₂ O ₃ Slag and Iron in Equilibrium and Reaction Conditions by M. Liukkonen, L.E.K. Holappa and D. Mu	163

SULPHIDE CAPACITY

Sulphur Solubility in CaO-Al ₂ O ₃ and CaO-Al ₂ O ₃ -CaF ₂ Slags by S. Ban-Ya, M. Hino, T. Kaji and T. Itoh	171
Determination of the Sulphide Capacities of Multicomponent Slag Systems by Gas/Slag Equilibration Method by R. Nilsson, M.M. Nzotta, D. Sichen and S. Seetharaman	177
Sulphur Behaviour Under Changing Partial Pressure of CO in Refining of FeCr Alloy by X. Pan and R.H. Eric	191

VISCOSITY I

Viscosities of Na ₂ O-SiO ₂ -B ₂ O ₃ Melts by R.G. Reddy, J.Y. Yen and Z. Zhang	203
Viscosity of Binary Borate and Ternary Borosilicate Melts by K. Nakashima, T. Kawagoe, T. Ookado and K. Mori	215
Development of Ultrawide Range Viscometer and Its Application to Boro-Silicate Glasses and Melts by Y. Shiraishi, S. Nagasaki and M. Yamashiro	223
The Effect of CaO on the Viscosity of PbO-SiO ₂ Melts by S. Wright, L. Zhang and S. Jahanshahi	231

THERMODYNAMIC MODELLING

• Solution Theories for High Temperature Ionic and Metallic Liquids by M. Blander	243
Calculating Models of Mass Action Concentrations for Mattes (Cu ₂ S-FeS-SnS) Involving Eutectic by Z. Jian	253
A Sub-Regular Solution Model for MnO-SiO ₂ -Al ₂ O ₃ -CaO Molten Slag and Its Applications by Z.X. Bing, J.G. Chang and X.K. Di	259
Evaluation of Surface Tension of Molten Salt Mixtures Based on Thermodynamic Databases by T. Tanaka, M. Ogawa, T. Ueda and S. Hara	263

ACTIVITIES II

MgO Control for Reduction of Refractory Erosion on Stainless Refining Furnace by T. Takaoka, Y. Miyata, K. Takahashi, A. Inoue and A. Watanabe	271
A Mechanism of Slagline Wear of Graphite-Bonded Zirconia Submerged Nozzle during Continuous Casting of Steel by J. Hong, J. Ko, J. Park and S. Kim	275
• Computer Modeling of Refractory/Slag/Metal Interactions by E. Pretorius and R. Marr	281

SLAG FOAMING

Slag Foaming in the FeO-SiO ₂ Based Desiliconization Slag System by S. Yi, H. Shin and C. Rhee	291
Drainage of Molten CaO-SiO ₂ -Al ₂ O ₃ Slag Films by C. Nexhip, S. Sun and S. Jahanshahi	297

THERMODYNAMICS: NON-FERROUS

Thermodynamics of Dearsenication and Deantimonisation of Copper and of the Reaction Products by J.K. Mangwiro and J.H.E. Jeffes	309
Oxygen Distribution between Molten B ₂ O ₃ Flux and Indium or Gallium by Y. Iguchi, M. Kinoshita, Y. Hino and T. Narushima	317
Solubility of Ni, Cu and Minor Elements in FeO _x -SiO ₂ -MgO Slag Equilibrating with Nickel Alloy by R.U. Pagador, M. Hino and K. Itagaki	321
Copper Solubility in Matte Smelting Slag by Y. Takeda	329
Selective Precipitation of Value-Nonferrous Metals Components from the Slags by Z. Sui, N. Fu and P. Zhang	341

PLENARY SESSION II

• The Solubility of Platinum in Molten Slags by N. Sano and S. Nakamura	353
• Bath Smelting Slag Reactions by B. Sarma and R.J. Fruehan	357
• The Use and Misuse of Capacities in Slags by I.D. Sommerville, A. McLean and Y.D. Yang	375

PHASE EQUILIBRIA

- A Study of the Liquidus Temperatures of Titano-Magnetite Smelting Type Slags
by *I.P. Ratchev and G.R. Belton* 387
- Phase Equilibrium Studies on TiO_2 -Rich Slags
by *H. du Plooy and P.C. Pistorius* 395
- Phase Relations and Liquidus Surfaces in SiO_2 - CrO_x - MgO - Al_2O_3 Slags ($\text{MgO}/\text{Al}_2\text{O}_3=2.0$)
by *K.L. Kossyrev and S.E. Olsen* 403
- The Effect of Chromium Oxide on the Phase Relations in the CaO - MgO - Al_2O_3 - SiO_2 - FeO_x System
by *R. Rait, S. Jahanshahi and S. Sun* 407
- High Temperature Phase and Thermodynamic Relations in Selected MnO - CrO_x Systems
by *A.M. Garbers-Craig and R.J. Dippenaar* 413

STRUCTURAL AND PHYSICAL PROPERTIES

- Infrared Emission Spectra of Molten Slags
by *M. Maeda, Y. Kariya and T. Ikeda* 423
- Structure and Behaviour of Oxide Melts
by *E.N. Suleimenov, T.V. Chnyrenkova, I.E. Suleimenov, G.F. Kluyiev and V.A. Luganov* 431
- Ion Refractory of Oxygen in Binary Alkali Earth Silicate Glasses
by *M. Susa, K. Kato, H. Fukuyama and K. Nagata* 441
- An Experimental Study of the Restriction on Fluorine and Alkali Contents Containing in Baotou Blast Furnace Slag
by *D. Hegui and M. Ximing* 447
- Role of Fluoride Ions in Molten Oxide-Fluoride Mixtures as Refining Fluxes for Molten Steel
by *S. Hara and T. Tanaka* 455

HIGH TEMPERATURE ELECTROCHEMISTRY AND MOLTEN SALTS

- Cu(II)/Cu(I)/Cu Redox in Alkali Borate Melts
by *T. Sakurada, H. Maekawa and T. Yokokawa* 463
- Solid State Current-Potential Sweep Sensor for the In-Situ Monitoring of Composition and Transport Properties in High Temperature Metallurgical Slags
by *S.C. Britten, V. Stancovski and U. Pal* 469
- The Possibility of Electro-Winning of Liquid Titanium using ESR Apparatus
by *M. Kawakami, M. Ooishi, T. Takenaka and T. Suzuki* 477
- Superheat Sensor for Electrolytic Hall-Héroult Cells
by *P. Verstreken* 483

REDOX EQUILIBRIA

- Redox Chemistry of Vanadium in Molten Binary Silicates and Slags
by *H. Chaudary, D.M. Miller, M.P. Brungs and G.R. Belton* 493
- The Thermodynamics of Titanium in CaO - MgO - Al_2O_3 - SiO_2 - TiO_x Slags
by *G. Tranell, O. Ostrovski and S. Jahanshahi* 501
- Thermodynamics of NiO, CrO and $\text{CrO}_{1.5}$ in CaO - SiO_2 - CaF_2 Slag
by *K. Ito, M. Igarashi, Y. Okabe and K. Matsuzaki* 507

VISCOSITY II

- Viscosity of Molten Slags Containing Iron Oxide and Alumina
by *S. Hara, K. Inoue and T. Tanaka* 515
- Experimental Studies of the Viscosities of Multicomponent Slags
by *F. Ji, D. Sichen and S. Seetharaman* 519
- ✱ • A Simple Test for the Measurement of Slag Viscosities
by *K.C. Mills, M. Halali, H.P. Lörz, A. Kinder, R. Pomfret and B. Walker* 535
- Evaluation of Correlations for Viscosity of Blast Furnace Type of Slags as a Function of Composition and Optical Basicity
by *V. Seshadri, C.A. Silva, I.A. Silva and F.L. von Krüger* 543

KINETICS

<i>H.L.</i> Phase Relations in Ferromanganese Slags during Melting and Reduction by <i>M. Tangstad and S.E. Olsen</i>	549
Hot Metal Desulfurization with Na_2O -CaO and CaO- Al_2O_3 Fluxes by <i>S. Mukawa, Y. Mizukami and Y. Ueshima</i>	557
Model Study of Mixing Time in Top Slag Layer Agitated by Gas Injection by <i>M. Iguchi, K. Nakamura and Z. Morita</i>	563

SOLUBILITY IN SLAGS

Phosphorus Distribution between Carbon Saturated Iron at 1350°C, and Lime-Based Slags Containing Na_2O and CaF_2 by <i>W.H. van Niekerk and R.J. Dippenaar</i>	571
Solubility of Nitrogen in CaO- SiO_2 - CaF_2 Slag System by <i>H.S. Song, D.S. Kim, D.J. Min and P.C.H. Rhee</i>	583
Solubility of Argon in Molten Nitrates Mixtures by <i>Y. Wang, Y. Sasaki, K. Kashiwaya and K. Ishii</i>	589

REACTIONS AT THE INTERFACE

Dynamic Wetting of Graphite by Slag Containing Iron Oxide by <i>N. Siddiqi, V. Sahajwalla, O. Ostrovski and G.R. Belton</i>	595
The Relationship Between Slag Structure, Sulphur Transport through the Phase Boundary and Interfacial Tension between Liquid Steel and Molten Slags by <i>T. El Gammal, E. Wosch and Z. Yang</i>	601
Mechanism of Dissolution of Burnt Lime into Molten Slags Containing Iron Oxide by <i>H. Sunayama, M. Kawahara, T. Kozuka, T. Mitsuo and Y. Mizukami</i>	613

THERMODYNAMIC MODELLING AND SIMULATION

• Thermodynamic Modelling of the System PbO - ZnO - FeO - Fe_2O_3 -CaO- SiO_2 for Zinc/Lead Smelting by <i>E. Jak, S. Degerov, P.C. Hayes and A.D. Pelton</i>	621
• Thermodynamic Modelling of Fluoride Molten Salts using the Cell Model by <i>M. Somerville, L. Zhang, M. Lim and S. Jahanshahi</i>	629
Molecular Dynamics Simulation of Ionic Melts by <i>D.K. Belashchenko and O.I. Ostrovski</i>	639
• Thermochemical Modelling of the Isasmelt Process by <i>J.S. Edwards</i>	647

PLENARY SESSION III

Challenges in Optimising and Controlling the Electrolyte in Aluminium Smelters by <i>M.P. Taylor</i>	659
Continuous Casting Powders and Their Effect on Surface Quality and Sticker Breakouts by <i>K.C. Mills</i>	675

PHASE EQUILIBRIA – NON-FERROUS

Phase Diagram Measurement and Calculation of the Rare Earth Involving Halide Systems by <i>Q. Zhiyu, X. Xianran, Z. Weidong, Y. Wenxia, S. Yimin and X. Yunan</i>	685
Phase Equilibrium and Minor Element Distribution between Slag and Copper Matte under High Partial Pressures of SO_2 by <i>G. Roghani, M. Hino and K. Itagaki</i>	693
Phase Diagram for the Pb-Cr-O System by <i>H. Miyagawa, M. Miyagawa, M. Susa and K. Nagata</i>	705
* • The Effect of Silica, Alumina, Calcia and Magnesia on the Activity Coefficient of Cobalt Oxide in Iron Silicate Slags by <i>X. Liu and E.J. Grimsey</i>	709
• Experimental Determination of Phase Equilibria in Lead/Zinc Smelting Slags and Sinters by <i>E. Jak, B. Zhao and P.C. Hayes</i>	719

REFRACTORY

Thermodynamics of Na ₂ O and K ₂ O in the Molten CaO-CaF ₂ -SiO ₂ System by <i>F. Tsukihashi and N. Sano</i>	729
Oxygen Potential Measurement of Iron Silicate Slag-Copper-Matte System by <i>Y. Takeda</i>	735
An Automatic Equipment for Determination of the FeO Activity – Laboratory and In-Plant Applications by <i>M. Iwase</i>	745
PbO Activity and Impurity Dissolution in PbO-FeO _x -CaO-SiO ₂ Slag by <i>N. Moon, M. Hino, Y. Lee and K. Itagaki</i>	753
Application of the Belton-Fruehan Mass Spectrometric Method to Study Thermodynamic Properties of Oxide Melts by <i>V. Stolyarova</i>	761

MOLD FLUX

Optical and Thermal Properties of Continuous Casting Mold Fluxes at Elevated Temperatures by <i>H. Shibata, J.-W. Cho, T. Emi and M. Suzuki</i>	771
Mold Flux for High Speed Continuous Casting by <i>M. Kawamoto, T. Kanazawa, S. Hiraki and S. Kumakura</i>	777
Visco – Elastic Behavior of Mold Flux for Continuous Casting of Steel by <i>K. Sorimachi</i>	781
Crystallization Behavior of Molten Fluxes for High-Speed Continuous Casting of Middle-Carbon Steel by <i>H. Sakai, T. Kawashima, T. Shiomi, K. Watanabe and T. Iida</i>	787
Development of Mold Flux for Continuous Casting of Type-304 Stainless Steel by <i>Y. Fukuda, H. Kawai, M. Okimori, M. Hojo and S. Tanaka</i>	791

METAL-SLAG-REACTION EQUILIBRIA

Dissolution of Metals in Slag with Special Reference to Phase Separation Thermodynamics by <i>A. Yazawa and S. Nakazawa</i>	799
Slag-Metal Reactions during the Continuous Casting of Steel by <i>P. Chaubal</i>	809
The Separation of Cobalt in Stainless Steels with Slags by <i>S. Lian, G. Shiang and Y. Lee</i>	817
A Thermodynamic Study on the Dephosphorization of Chromium Containing Molten Iron by <i>S.E. Lee, J.J. Pak and S.H. Kim</i>	823

TRANSPORT PROPERTIES AND MOLD FLUX

Factors Affecting the Diffusivity of Ions in Liquid Slags by <i>R.F. Johnston</i>	833
The Effect of Iron Oxide on the Chemical Diffusivity of Oxygen in Slags by <i>Y. Sayad-Yaghoubi, S. Sun and S. Jahanshahi</i>	839
Effect of Al ₂ O ₃ and TiO ₂ Additions on the Lubrication Characteristics of Mould Fluxes by <i>P.W. Johnston and G. Brooks</i>	845
Evaluation of Solidified Slag Films from Mould Powders used in C.C., Taken from Plate/Mold Interface by <i>M. Vinicius de A. Fonseca, O.D.C. Afrange, A. de O. Lavinhas, A.A. Ramos and C.A.G. Valadares</i>	851

MODELLING TRANSPORT PROPERTIES

♦ Modelling Viscosity of Silicate Melts by <i>L. Zhang and S. Jahanshahi</i>	861
Viscosity Models for Fluxed Australian Bituminous Coal Ashes by <i>H.J. Hurst, F. Novak and J.H. Patterson</i>	873
★♦ An Equation for the Viscosity of Molten Multicomponent Fluxes and Slags by <i>T. Iida, H. Sakai, T. Kawashima and Y. Kurihara</i>	877
